

KWM is pleased to announce that we will be partnering with the Manhattan MBDA Business Center (NYCMBC) on the Goethals Bridge Replacement Project. NYCMBC has been quite successful at using their expertise and strategic partnerships to secure contracts and financing for minority-owned companies, and we are excited to be working with them to outreach to the DBE community.

NYCMBC will be assisting us with identifying DBE companies for the project, as well as offering their services to minority-owned companies interested in taking part in this project. NYCMBC is especially adept at helping companies secure financing, both in the forms of lines of credit and bonding, and we urge your company to contact them if you're a DBE company in need of financing to participate in this project. NYCMBC can also assist your company with becoming DBE-certified.

For more information, please feel free to contact:
